Alexandria, VA 22313-1450

PETITION TO WITHDRAW HOLDING OF ABANDONMENT

UNDER 37 C.F.R. § 1.181

Applicant hereby petitions that the holding of abandonment of the above-identified patent application be withdrawn, under 37 C.F.R. § 1.181. A copy of the Notice of Abandonment is enclosed.

The Notice of Abandonment is based on an alleged failure to reply to the Office Action dated January 25, 2006. Applicant filed a response to the Office Action on July 25, 2006 as evidenced by the attached copy of the stamped, return receipt postcard, which was stamped on July 31, 2006. A copy of the response as filed under 37 C.F.R. § 1.8(a) on July 25, 2006 is also enclosed herewith. Additionally, Applicant encloses herewith a copy of the Image File Wrapper from PAIR, which indicates that an Amendment After Non-Final Rejection, Claims, a Fee Worksheet, Applicant Arguments/Remarks Made in Amendment, an Extension of Time and a Transmittal were received and entered on July 31, 2006.

Applicant accordingly believes that the papers filed on July 25, 2006 constitute a timely and complete response to the last pending Office Action.

Applicant does not believe that this petition requires a fee, as Applicant timely filed the response, and thus did not abandon this application. Accordingly, no such fee is included. In the event Office personnel determine that such fee is due, Applicant's representative authorizes that the fee be charged to Deposit Account No. 23/2825. If any additional information is needed, please contact the undersigned at the number listed below.

Respectfully submitted,
Edward P. Ingenito, Applicant

AMENDMENTS TO THE CLAIMS

Applicant has submitted a new complete claim set showing marked up claims with insertions indicated by underlining and deletions indicated by strikethroughs and/or double bracketing.

1. (Currently Amended) A non-surgical method of reducing lung volume in a patient, the method comprising administering, by way of the patient's trachea, to the target region of the patient's lung, a composition comprising an anti-surfactant composition, wherein the composition promotes collapse of ~~whereafter~~ the target region ~~collapses~~ and one portion of the target region adheres to another portion of the target region, thereby reducing the patient's lung volume.
2. (Original) The method of claim 1, wherein the anti-surfactant composition comprises 3-12% fibrinogen.
3. (Original) The method of claim 2, wherein the anti-surfactant composition comprises about 10% fibrinogen.
4. (Original) The method of claim 2, wherein the fibrinogen is autologous fibrinogen.
5. (Original) The method of claim 2, wherein the anti-surfactant composition further comprises a fibrinogen activator.
6. (Original) The method of claim 5, wherein the fibrinogen activator is thrombin, a thrombin receptor agonist, or batroxobin.

8. (Original) The method of claim 1, wherein the anti-surfactant composition comprises from about 10 mg/ml to about 200 mg/ml fibrin.
9. (Original) The method of claim 8, wherein the anti-surfactant composition comprises from about 20 mg/ml to about 200 mg/ml fibrin.
10. (Original) The method of claim 9, wherein the anti-surfactant composition comprises from about 20 mg/ml to about 100 mg/ml fibrin.

REMARKS

Claims 1-18 were previously pending in this application. Claim 1 has been amended without prejudice or disclaimer. As a result, claims 1-18 remain pending for examination with claim 1 being an independent claim. Basis for the amendment can be found throughout the specification as filed. No new matter has been added.

Applicant acknowledges the withdrawal of the double patenting rejection and the indication that claims 2-14 would be allowable if rewritten in independent format. However, Applicant respectfully requests reconsideration of the remaining rejection in view of following remarks.

Rejection Under 35 U.S.C. §102

Claims 1 and 15-18 were rejected under 35 U.S.C. §102(e) as being anticipated by Biggs et al. (US Patent Number 6,174,323) referred to herein as "Biggs et al."

Applicant respectfully submits that the disclosure of Biggs et al. is significantly different from the present invention. Specifically, Biggs et al. provides a device that can be used to cause lung collapse by attaching anchors to different portions of a lung and drawing the anchors towards one another using cords. In contrast, the present invention relates to using a composition comprising an anti-surfactant to promote lung collapse.

The Office Action pointed to column 6, lines 1-6 of Biggs et al. for a disclosure of an anti-surfactant composition. Applicant respectfully submits that the glue disclosed in this passage relates to connecting the cords that are used to pull on the anchors of the device of Biggs et al. Therefore, Applicant submits that Biggs et al. fails to disclose a composition comprising an anti-surfactant that promotes collapse of a target region of a patient's lung as presently claimed.

Accordingly, withdrawal of the rejection under 35 U.S.C. §102 is respectfully requested.

CONCLUSION

COPY

A Notice of Allowance is respectfully requested. The Examiner is requested to call the undersigned at the telephone number listed below if this communication does not place the case in condition for allowance.

If this response is not considered timely filed and if a request for an extension of time is otherwise absent, Applicant hereby requests any necessary extension of time. If there is a fee occasioned by this response, including an extension fee, that is not covered by an enclosed check, please charge any deficiency to Deposit Account No. 23/2825.
